

Some people say that they can't imagine their life without books. I fully agree with them and believe that a book is one of the greatest wonders in the world. It gives unique chance to link up with authors who lived hundreds and thousands of years ago. Thanks to books we can talk to people who lived in different ages and countries. Through reading books we hear their voices, thoughts and feeling.

Nowadays we often forget that the book is everything. It is the foundation of our knowledge. Books teach us to be kind and understanding, brave and honest. They give us food for thought and arouse emotions such as sympathy, admiration, delight, horror.

I think the present generation prefers playing computer game to reading good books. As for me I did not like to read books five years ago. I did not understand the sense of reading. But I like to read books now as I found my favorite genre. It is a fantastic story. I think Reading has become a forgotten pleasure because people can't find books or stories which can be interesting for them. Besides the main problem about it is a great amount of modern gadgets. Nowadays the most source of information is the Internet. So people forget about reading books. We can read books for information, for pleasure, for self-development. Reading books you can travel to faraway countries learn a lot of interesting things about their traditional and customs. There are a lot of kinds of books. You can choose any book about animals, nature. For example: poems, detective story, horror story and adventure story. Besides you can choose any writer (A.S. Pushkin, M.Y. Lermontov, L.N. Tolstoy or any modern one)

Reading is pleasure. I want to give advice to those who don't like to read: if you don't read you can't verily think. The foundation of our knowledge lies in reading books. Reading good books enriches the mind and life. It helps us in our education. Reading plays an important role in our life. Read books and enjoy reading them!
