

Today many people forgot about reading books. I think many people don't think about their future. The next generation must transfer the book. On the one hand, people can't live without the Internet. We use it every day. On the Internet we can find and read any book. But now reading is forgotten pleasure. People began to read less. They forgot that books teach us to be polite, brave, kind, understanding and honest, that they give us food for thought and arouse emotions.

In addition to this, reading plays an important role in our live. The book is the best friend a human being can have. Unfortunately, today few people like to read. Many people prefer to watch movies instead of reading books. They think that films can replace the book. But it is not true. When a person reads a book, he is immersing himself. He lives a whole life as long as holding a book. In my opinion everybody finds something new for himself in the book. Someone sees himself in the place of its characters and someone wants to become a hero. A person won't get bored or sad either. Besides we can read about people, important events of our history and many news, for example, about sports news. We use text books at school. If you want to understand people around you should read books.

A book is one of the greatest wonders in the world. It gives unique chance to link up with authors who lived hundreds and thousands of years ago. I read for pleasure and for information. I like to read detective stories and adventure stories. I'm sure that reading is pleasure and it is not forgotten for me. When you understand that the book is over, you feel sorry. You want it to be continued.
